

Dr. Julie Anderson has a dual appointment as an Assistant Professor and member of the Research Faculty in the School of Renewable Natural Resources at Louisiana State University and a Fisheries Specialist for Louisiana Sea Grant. She received her Ph.D. in Marine Biology and Biochemistry from the University of Delaware. Dr. Anderson is a specialist in biochemical cues and fisheries science, and has done extensive research on the Asian shore crab and other crustaceans. She is currently working with the blue crab fishery and the effects of oil on fisheries populations. Dr. Anderson is the current editor of the Lagniappe – the monthly fisheries newsletter published by Louisiana Sea Grant.
