

Richard A. Snyder, University of West Florida, is Professor and Director of the Center for Environmental Diagnostics and Bioremediation. He received both his M.S. and Ph.D. from the University of Maryland. His research interests include: Microbial and macro ecology; with emphasis on marine and estuarine systems; water quality issues from agricultural runoff and septic tank impacts at site and watershed scales; use of biofilm microbial community structure and function as indicators of ecosystem status; body burdens of toxic materials in estuarine fauna; Wet prairie community structure as an indicator of ecosystem restoration success.
